Chapter 5 Basics Of Projective Geometry

The Projective Space $P(E)$ Can Be Viewed As The Set Obtained From E When Lines Through The Origin Are Treated As Points. However, this Is A Somewhat Deceptive View. Indeed, Depending On The Structure Of The Vector Space E , a line (through the origin) in E May Be A Fairly Complex Object, And Treating A Line Just As A Point Is Really A Mental Game. For Example, E May Be The Vector Space Of Real Homogeneous ... 9th, 2021
